A multidisciplinary and multisectoral collaboration, through a One Health approach, is required to effectively prepare for, detect, assess, and respond to emerging and endemic zoonotic diseases.

However, external and internal health system evaluations continue to identify major gaps in capacity to implement multisectoral and multidisciplinary collaboration within and between many countries, and countries are asking for support from the Tripartite ⁽¹⁾ to fill these gaps. This guide is the response to those requests.

(1) The Tripartite is composed of the Food and Agriculture Organization of the United Nations (FAO), the World Organisation for Animal Health (WOAH) and the World Health Organization (WHO).

Taking a multisectoral, One Health approach: A tripartite guide to addressing zoonotic diseases in countries

KEYWORDS

#antimicrobial resistance (AMR), #capacity building, #disease control, #emerging zoonosis, #food safety, #One Health, #public health, #risk assessment, #Tripartite (FAO/WOAH/WHO), #Tripartite Zoonoses Guide (TZG), #World Organisation for Animal Health (WOAH), #zoonosis.

WOAH (founded as OIE) is a global organisation, working to ensure the health of animals across the world. Since 1924, we have focused on the complexities of animal health. We disseminate information on animal diseases and use science-based strategies to limit their potentially negative impact on society.
