World Organisation for Animal Health (WOAH)
2021

40 pages

ISBN: 978-92-95121-15-7

Antiparasitic resistance is an important challenge across the world, including all World Organisation for Animal Health (WOAH, formerly OIE) regions. This type of resistance poses a significant threat to animal health and welfare and can result in production losses in food-producing species, thus presenting a serious concern for food security.

The results of two surveys that were conducted in Africa, the Americas, Asia and the Pacific, Europe and the Middle East in 2020 and 2021, to assess antiparasitic agents and resistance and the prudent use of anthelmintic chemicals, respectively, are incorporated into this document, which focuses on anthelmintic resistance in grazing livestock.

The WOA Headquarters would like to acknowledge the involvement of the WOA Delegates and their respective Focal Points for Veterinary Products who responded to the surveys, as well as the five WOA Regional Representations for carrying out both surveys in coordination with the WOA Antimicrobial Resistance and Veterinary Products Department.

Responsible and prudent use of anthelmintic chemicals to help control anthelmintic resistance in grazing livestock species

KEYWORDS

#antiparasitic resistance, #WOAH publication, #parasitic worm, #World Organisation for Animal Health (WOAH).

WOAH (founded as OIE) is a global organisation, working to ensure the health of animals across the world. Since 1924, we have focused on the complexities of animal health. We disseminate information on animal diseases and use science-based strategies to limit their potentially negative impact on society.
