*An extraordinary meeting of the Council of the World Organisation for Animal Health (WOAH, founded as OIE) took place virtually on 7 December 2021. This meeting was held at the request of the Council members as a follow-up to the WOAHA regular budget-related discussions of the previous meeting.*

The WOAHA Council was given a detailed and quantified presentation of strategies to ensure sustainable funding of the Seventh Strategic Plan from the WOAHA regular budget from 2023. Among the various options proposed, the Council agreed that the most sustainable way to increase income to the regular budget was through a 30% increase of statutory contributions over the next three years. An explanatory note accompanied by the full minutes of the Council meeting was accordingly sent to all Delegates at the beginning of 2022.

During its virtual March meeting (8–10 March 2022), as is customary, the WOAHA Council validated the various documents related to technical and administrative matters to be addressed by the World Assembly of Delegates during the 89th WOAHA General Session, held in May 2022.

The Council met face-to-face for the first time in more than two years on 19 and 20 May 2022 at WOAHA Headquarters in Paris. This meeting focused on fine-tuning preparations for the 89th General Session. As a first step, the Council agreed to propose an increase in statutory contributions for the year 2023.

**WOAH (founded as OIE) is a global organisation, working to ensure the health of animals across the world. Since 1924, we have focused on the complexities of animal health. We disseminate information on animal diseases and use science-based strategies to limit their potentially negative impact on society.**
