This study has been developed with the financial assistance of the [WMD Threat Reduction Program – Global Affairs Canada](#).

### Objectives

This work focuses on the two key areas aimed at national Veterinary Services' capacity to prevent, detect and respond to outbreaks of animal diseases, including recovery:

- a. [National Contingency Plans](#)
- b. [OIE PVS Pathway](#).

### Expected outputs

- a. National Contingency Plans: (i) a preliminary analysis of the current trends in global capacity for contingency planning in animal health and preparedness for emergency response which will help to target capacity building; (ii) a preliminary analysis of the involvement of animal health sector in multi-sectoral national contingency plans for natural disasters
- b. OIE PVS Pathway: Identify gaps in national Veterinary Services' capacity for emergency management which may benefit from capacity building assistance.
