Improving aquatic animal health and welfare worldwide

World Organisation
for Animal Health
Founded as OIE

bulletin.woah.org

The Aquatic Animal Health Code (the Aquatic Code) provides standards for the improvement of aquatic animal health and farmed fish welfare worldwide. These standards should be used by Members to set up measures for the prevention, early detection, reporting and control of pathogenic agents in aquatic animals (amphibians, crustaceans, fish and molluscs). Implementation of the recommendations in the Aquatic Code ensures the safety of international trade in aquatic animals and aquatic animal products, while avoiding unjustified sanitary barriers.

WOAH (founded as OIE) is a global organisation, working to ensure the health of animals across the world. Since 1924, we have focused on the complexities of animal health. We disseminate information on animal diseases and use science-based strategies to limit their potentially negative impact on society.
