The United Nations Secretary-General's Mechanism to carry out prompt investigations in response to allegations brought to his attention concerning the possible use of chemical and bacteriological (biological) and toxin weapons was developed in the late 1980s. Triggered by a request from any United Nations Member State, the Secretary-General is authorized to launch an investigation including dispatching a fact-finding team to the site(s) of the alleged incident(s) and to report to all United Nations Member States. This is to ascertain in an objective and scientific manner facts of alleged violations of the 1925 Geneva Protocol, which bans the use of chemical and biological weapons, or other relevant rules of customary international law.
