

New calls for tender for the OIE rabies and OIE PPR Vaccine Banks

19 February to 19 April 2021

A decade ago, the OIE established a mechanism to facilitate the procurement of high-quality vaccines, manufactured in accordance with OIE standards, for the benefit and use of its Members: **the OIE Vaccine Banks**.

As the OIE intends to continue providing this service to its Members and in line with the procurement procedures set out for the OIE Vaccine Banks, new calls for tenders for the OIE **rabies** and OIE **PPR** Vaccine Banks have been launched today. These two distinct calls will determine which suppliers will furnish these two OIE Vaccine Banks for at least the next four years (2022-2025).

The final deadline for suppliers to respond to these calls is **19 April 2021**.

All the information related to the call for tender (2 documents for each call), Document A – ‘Tender Procedure Rules’ and Document B ‘Terms of Reference’ is available from this link:
